Federal Funding for Education Data

State leaders can use various federal funding streams to support state data systems or related data activities. These federal funding streams can be broadly categorized as **flexible** (can be used for a variety of purposes, including data), **allowable** (specify data as an allowable activity), or **dedicated** (are allocated specifically for data).

In the pages that follow, we’ve identified the amount of fiscal year 2022 funding that could be leveraged for these purposes. Wherever possible, we have attempted to identify the specific funding amount that could be used to support data systems or related activities unless otherwise clarified in the tables that follow. For grants that have funds that can be used flexibly or include data as an allowable activity, the choice to prioritize state data systems or related activities using these funding streams is at the grantee’s discretion. While states can use these funds for data priorities, they may have already planned to use the funds for other purposes, so redirecting them either now or in the years ahead would require a leadership decision.

These figures represent primarily state-level funding; additional funds flow to local entities and in many cases could also be used for local data activities. The tables in this document describe programs from across agencies. The programs that are listed are considered discretionary, have a set appropriation each fiscal year, or were a one-time investment with obligation or spending deadlines beyond the current fiscal year.

ESSA programs that can be used to support state data systems or related data activities include:

- Title I, Part A;
- Title I, Part B, State Assessment Grants;
- Title II, Part A; and
- Title IV, Part A.
ESSA Title I, Part A

What are these funds?
Title I’s purpose is to ensure that all students have “fair, equal, and significant opportunity to obtain a high-quality education and reach, at a minimum, proficiency on challenging State academic achievement standards and state academic assessments.”

How can they be used to support data?
Title I, Part A requires state education agencies (SEAs) to collect and report a number of data points, including administration of assessments and related accountability systems. States may use funds to report data, target supports, and monitor and evaluate local education agencies (LEAs).

**What are these funds?**
Title I, Part B provides funding for states to administer the statewide assessments required by the law.

**How can they be used to support data?**
This funding can be used to design state report cards and examine the supports needed to effectively use assessment data.

**Find Out More**

### What are these funds?
Title II, Part A supports the preparation, training, and recruitment of high-quality teachers, principals, or other school leaders.

### How can they be used to support data?
Funds can be used for professional development related to data, including data use and privacy capacity building, equipping school leaders and other professionals to use achievement data to inform professional evaluations, and more.

### Who gets them?
- SEAs
- LEAs

**Flexible, allowable, or dedicated?**

ESSA Title IV, Part A

What are these funds? Title IV, Part A (the Student Support and Academic Enrichment Grant program) supports student access to a “well-rounded” education; technology acquisition; and a wide range of activities, including professional development focused on data use.

How can they be used to support data? State funding can be used to monitor and provide technical assistance to school districts, to increase school leaders’ capacity to use data to improve and personalize instruction, and to share best practices regarding data security and use.

Perkins V programs that can be used to support state data systems or related data activities include:

- State Leadership Funding; and
- State Administration.
Perkins V State Leadership Funding

What are these funds?
Perkins V state formula grants are intended to support state efforts to improve career and technical education (CTE) programs and overall system quality.

How can they be used to support data?
A portion of all Perkins V state leadership funds must be used to support states’ ability to report on learner performance within the law’s performance accountability system. An allowable use of funds includes “enhancing data systems to collect and analyze data on secondary and postsecondary academic and employment outcomes.” These funds may also be used to improve data systems and related collection efforts on skills assessments.

- State “lead agencies”

Flexible, allowable, or dedicated?
- Flexible
US Department of the Treasury
Coronavirus Capital Projects Fund (CPF)

Early Childhood  K–12  Postsecondary  Workforce

$9.5 billion

What are these funds?
The American Rescue Plan provides funding dedicated specifically to carrying out “critical capital projects directly enabling work, education, and health monitoring.”

How can they be used to support data?
While investments in data systems are not presumptively eligible projects under the CPF program, the Treasury Department has issued guidance making clear that eligible applicants may pursue projects that are not explicitly detailed in this guidance so long as they align to the core objectives of the CPF program. These applications are reviewed on a case-by-case basis. Data system projects could be justified by demonstrating how such an investment directly enables work, education, and health monitoring or is addressing a critical need within a community or one that was exacerbated by the pandemic.

## What are these funds?

The American Rescue Plan provides funding to eligible state, local, and tribal governments to bolster their responses to the pandemic and its related economic impacts. Eligible recipients have broad flexibility in deciding how best to make use of these resources to meet the needs of their communities.

## How can they be used to support data?

These funds may be used to support data systems and related activities that bolster the public sector’s capacity to respond to the negative impacts of the COVID-19 pandemic. These uses include efforts to “improve the design and execution of programs responding the [pandemic] and to administer or improve the efficacy of programs addressing [the pandemic] or its negative economic impacts” among other enumerated eligible uses of funds. A significant degree of flexibility is afforded to eligible applicants in determining these uses of funds as described in the [final program rule](https://www.whitehouse.gov/coronavirus-response/american-rescue-plan/american-rescue-plan-final-rules/) and related [guidance](https://www.whitehouse.gov/coronavirus-response/american-rescue-plan/american-rescue-plan-final-rules/).
